Technology	Document Storage & Retrieval & Bulk Scanning	Current	Document management services will work as a tiered service provision for storage, scanning, EDRMS and a fully managed service for data and record management which can be provided on or off site. Secure storage and retrieval services, both box and file level, whilst maintaining all the key elements; intake, cataloguing, indexing and secure storage of existing physical/data files, new physical/data files, additional security of extra sensitive files, transfer management of physical files in secure transport services with a stringent service level agreement and provision of out of hours services. Secure retrieval, on request, of current files via a scan on demand service in multiple formats. Providing 'deep' storage and secure destruction of records. High-volume, high quality scanning of documents in multiple formats. Online portals; access for named users to the cataloguing system in order to search/locate and order files. Offers transparency and efficiencies in managing records and supporting the digitisation strategy to integrate records into the electronic patient record systems. Offers organisations another route to EDRMS as a stand alone software platform rather than a fully managed service.	07/12/2020	Stephen Evans	stephen.evans@eoeceph.nhs.uk	07983 339019
Technology	E-catalogue and E-requisitioning solution	Current	Provision of ecatalogue and erequisitioning solution. Single supplier framework.	31/11/2018	Darren McVee	darren.mcvee@eoeceph.nhs.uk	07950 959437
